

VEIT *eMotion* Series

eMotion
more performance
more quality
less energy

up to
-40%
energy costs

Saving energy means cutting cost!

The problem: increasing cost pressure in the garment industry.

By relocating production plants increasingly further away from Europe and North America and with raw material prices falling, the garment industry until recently was in a position to continuously reduce production cost.

Now this development has reached a limit:

- **Lowering wages**
 - hardly possible any more
- **Lowering costs of material**
 - very small potential
- **Lowering energy costs**
 - **huge potential** exemplarily shown on **Double Legger machine:**
 - 8 hours operating time; € 7.50 cost for steam (€ 0.05 per kg)
 - at two shifts:
 - savings of up to **€ 1,320 per year**
 - complete trouser line up to **€ 13,000 per year**

VEIT **eMotion** practical test: saving € 190,000!

Bertram Rollmann, owner and CEO of Pirintex about his experience with the VEIT **eMotion system**

Q: Mr. Rollmann, why did you – as a manufacturer of high quality garments in a low wage country – decide to go for an energy efficiency system?

A: Rising energy costs and labour costs that cannot be reduced any further are the main cost drivers in the garment industry. As a major consumer of energy we are forced by the government to reduce our CO₂-emissions sustainably, otherwise we will be facing sanctions.

Q: Mr. Rollmann, by how much were you able to lower the steam consumption on the lines equipped with the VEIT **eMotion** system?

A: After the first calculations we were thinking that 25 % might be

realistic. We were really amazed that after the installation, the steam consumption of the whole line has gone down by over 40 %!

Q: How much are you saving per year?

A: Assuming that the whole factory will soon be equipped with the **eMotion** System I am sure that I will save approximately € 190,000.

Q: Does the system work only with BRISAY machines or can competitors' machines also profit from the new development?

A: Although we use BRISAY machines for 95 % of our production, we also tested the system on two machines of competitors and got similarly fantastic results.

Q: Would you recommend the system?

A: For sure! It's the easiest way to save money. Furthermore, operators are less stressed as the climate in the factory has improved significantly and last but not least it helps to protect the environment.

Q: Mr. Rollmann, thanks a lot for the interesting conversation!

up to
-40%
energy costs

The VEIT *eMotion* package is based on 4 elements:

1. **Energy box**: contains the central steam conditioning and distribution.
2. **Machine-specific isolation** is the key for further savings. Less radiation heat lowers the A/C cost and improves the comfort for the operator.
3. An **intelligent, programmable controller** regulates the steam supply. Only the needed amount of steam is fed into the system. During stand-by, heating is reduced in several steps. Still, it is possible to resume work immediately.
4. A **central remote control unit** manages all *eMotion* machines via WLAN.

Please note:

In the future all garment manufacturers will have to declare the **CO₂-emission** used during the production process. VEIT *eMotion* guarantees **optimal low emissions** and makes you ready for the future.

VEIT *eMotion* „Retrofit-Kit“

In order to realize huge savings also with older machines or competitors' machines, we created a retrofit kit. With some easy modifications, it is possible to save up to 40 % on your existing machines*! The VEIT *eMotion* Retrofit Kit contains all necessary parts to modify a machine with VEIT *eMotion*.

No matter what machines you are using we help you to lower your energy costs drastically!

* depending on buck size, shape and configuration of the machine

Pressing for Excellence – Why you can rely on the VEIT-Group

For over 50 years, the requirements and the challenges of our customers have been our most important undertaking. For decades, world famous brands in the German and international garments industry have placed confidence in the innovative, high quality products and services offered by the VEIT-Group.

Our experts consult and partner with you in finding the best possible solution for your project needs, whether you require individual machines or a complete product line.

Prompt delivery and professional installation of our machines and systems go hand in hand with premium training, through which we equip your staff with the skills necessary to achieve the highest possible production.

Worldwide 24-Hour Service Hotline

Our service technicians are always available, around the world and around the clock, maximizing continuous production.

We look forward to dealing with you personally!
